Listener Integration

AI FALSE ALARM FILTERING SOLUTION

listener
Control Room Management

VIDEO MONITORING IN LISTENER

Take advantage of the shift in technology to IP camera surveillance systems! Provide effective off-site monitoring for clients who are using video. The latest 3rd generation Listener product - Listener has the functionality to include powerful AI false alarm filtering provided by DeepAlert enabling accurate video verification and ensuring a better monitoring service to clients!

FALSE ALARM FILTERING

DeepAlert's powerful false alarm filtering system is now available in Listener. Leverage the power of DeepAlert's AI alarm filtering system for ANY camera in your Listener ARS. Enjoy world class video analytics for your world class Alarm Receiving System!

REDUCE FALSE ALARMS FROM **ANY** CAMERA

There's no need to tolerate simple "motion trigger" alerts from cameras connected using ONVIF protocol. DeepAlert connects to ALL cameras including analogue cameras and thermal cameras providing a powerful false alarm filter and delivering verified alerts into your Listener ARS.

● EVENT TRIGGERS
● AI FILTERED ALERTS

AI FILTERED ALARMS FROM ANY CAMERA

ACCURATE | AFFORDABLE | RELIABLE

deepalert
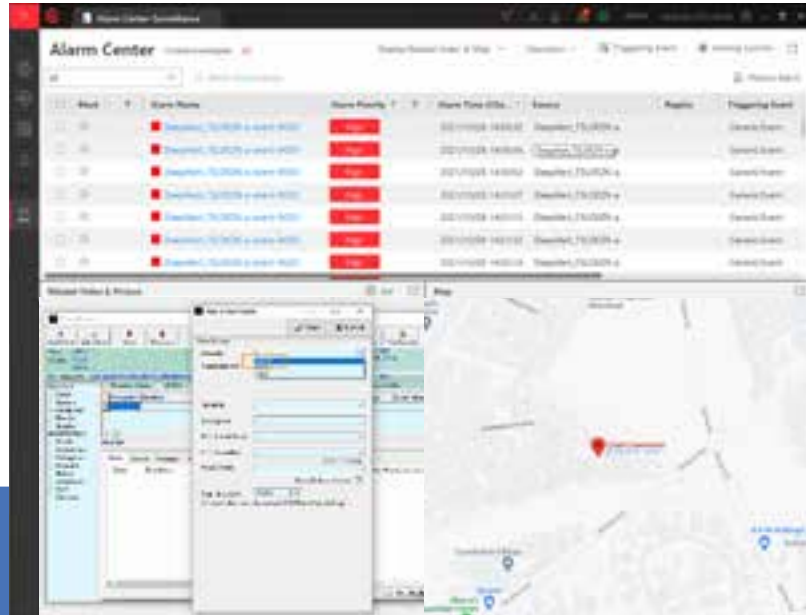

SAME LISTENER INTERFACE FOR YOUR OPERATORS

There's no need to train your monitoring operators. Your filtering alerts are delivered into Listener as per usual - only fewer of them enabling operators to focus on real threats and monitor greater numbers of cameras.

NO 'MANUAL' LISTENER CONFIGURATION REQUIRED

There's no need to individually configure cameras, events, sites or alarming schedules on your Listener interface, this can be done globally on the DeepAlert management interface.

SCALE YOUR BUSINESS QUICKLY - ACCEPT ALL BRANDS OF SURVEILLANCE SYSTEMS IN YOUR CONTROL ROOM

Grow your monitoring business by accepting clients with different brands of surveillance systems with confidence!

Scale cost effectively with licences per channel either annually or monthly. Enjoy financial flexibility with no contract lock-in or set up costs.

Listener Integration

SIMPLE, REMOTE CONFIGURATION - SAVE ON HARDWARE AND INSTALLATION COSTS!

It takes minutes to connect the DeepAlert AI false alarm filtering system simply and remotely to the NVR or cameras of the surveillance system. There's no hardware required and no need to send a technician to site. Configure DeepAlert from the comfort of your office at your convenience and welcome new clients to your monitoring operation.

DELIVER ALERTS IN TELEGRAM MOBILE APP!

Give your clients extra value by delivering alerts into the Telegram mobile app as well as your Listener ARS giving your clients immediate visibility of alerts!

Augment your Listener Alarm Receiving System with DeepAlert false alarm filtering service and improve your monitoring operation by focusing only on the threats that matter.

SAY NO TO FALSE ALARMS, SAY YES TO MORE CLIENTS!
